

## Example of Task 2,3 – Wireframe and Mockup

Example of a Storyboard using Figma's Prototype feature

Example of a Storyboard using Mock-ups that I've copy pasted in Word & added arrows, text to explain what the flow will be to make it more detailed & clearer. Ideally, if there is a button, there needs to be an arrow from it. If you have a bottom tab navigator, you could show it from one of the screens and have a note that from all the pages, so that it doesn't look cluttered
